Creation and proposal of annotation data for AI learning

- Help customers improve AI accuracy and reduce engineering resources by performing their annotation works
- Utilize human resource management skills and practical AI development knowledge which Yazaki have cultivated in automotive industry

- Yazaki's annotation specialists provide consistent, high-quality annotation data
- Utilize Yazaki assets to provide the service at reasonable costs
- Acceptable high-difficulty cases that other companies cannot handle based on utilizing extensive knowledge and technologies

1 Determine Requirements

Representative person who has AI knowledge supports the best annotation works with customers from determine requirements

Project Manager

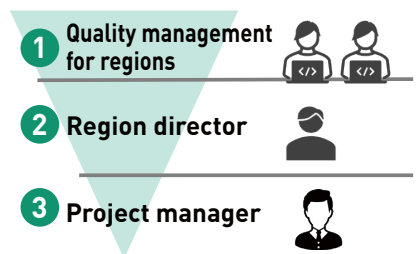
2 Annotation Works

Professional annotation workers
Reliable security management system

Many similar points

3 Deliver Data

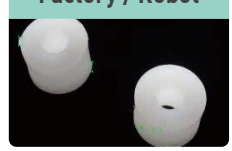
Max. triple quality check including for all volumes

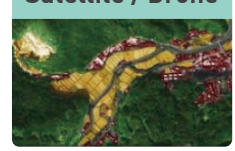


Industry / Area

■ Support for various industries / areas

Mobility / City	Factory / Robot	Satellite / Drone	Agriculture
			





■ Support for various annotations
