Yazaki Corporation

## Yazaki Corporation to Exhibit at Japan Mobility Show 2023

Yazaki Corporation (Headquarters: Minato-ku, Tokyo; President: Riku Yazaki) will exhibit at the Japan Mobility Show 2023 to be held at Tokyo Big Sight (Koto-ku, Tokyo) from October 26 (Thursday) through November 5 (Sunday).

Our exhibition concept is "Connect to the Future."

Using clear and simple examples, at our exhibition booth we intend to show how Yazaki's technologies and products are essential for the mobility society of the future.

As shown below, the main exhibits will include two mockups and a wall display. Displays will be placed in the center of the booth and on the back of the mockups, showing videos depicting Yazaki's technologies that will support the mobility society of the future.

#### 1) Exciting BEV video content demonstration

A video depicting Yazaki's vision of the future mobility society will be shown on a mock-up modeled after a car platform.

In an easy-to-understand manner the video will show how, by combining our multiple technologies, Yazaki will play a vital role in the realization of a mobility society.

#### 2) Next-Generation Commercial Vehicle Cockpit

Assuming the appearance of future commercial vehicles (buses, taxis, trucks, etc.), this mockup represents a cockpit (driver's seat) in which multiple types of information are displayed in an optimum arrangement. It is possible to actually get in the cockpit and view an image video depicting the driver's safe and secure driving experience.

#### 3) EEDS solutions (wall display)

Envisioning the BEV (Battery Electric Vehicle) of the near future, the high voltage, low voltage, power supply products, and communication systems that our company handle are represented in a mock-up that resembles a car platform.

The mocks are installed on the wall, allowing visitors to see each system up close.

#### 4) Other exhibits (examples)

- Display meter
- Head up display
- YDX-8 Digital Tachograph
- Annotation service
