

Innovative meter in response to needs from end users

- Improve UX with Next-Generation Smart Meter that can be personalized and linked to smartphones (apps)
- Showing smartphone information on the meter provides comfortable, convenient and enjoyable in-vehicle time

CASE ①

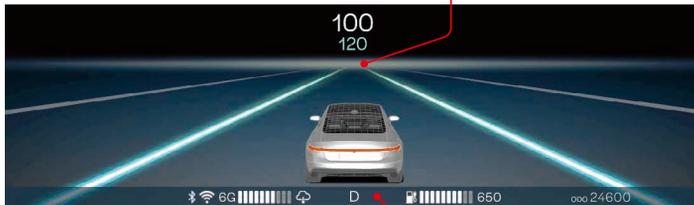

- Same color as owned vehicle
- Change background (color, pattern) up to mood
- Customize the font

Precondition

- Vehicle basic information is always displayed
- Drivers can watch movies or play games during autonomous driving or parking

Meter Display

ADAS displays, Peripheral monitoring information etc.

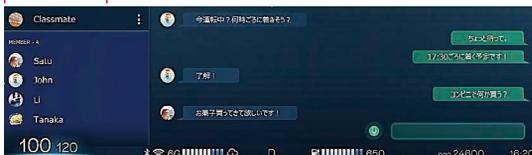

Vehicle Basic Information (Gear, Fuel etc.)

Smartphone

CASE ②

SNS

Game

- Display photos from a smartphone on the meter
- Watch movies from smartphone on the meter screen
- Display SNS on the meter
- Play games on the meter
- Talk to favorite characters
- Audio meeting with the meter
- Schedule management on the meter
- Connect to home and vehicles with the meter
