# Creation and proposal of annotation data for AI learning

**Back Ground**

- **Create environment to concentrate AI development for helping customers to improve AI accuracy and to reduce engineering resources by utilizing human resource management skills and AI development knowledge which Yazaki have cultivated in automotive industry**

**Feature**

- **Create high quality annotation data**
- **Accept high level of difficult cases from requirement definitions**
- **Proposals utilized practical AI development knowledge**

**Performance/Specification**

| 1 Study Specification | 2 Annotation | 3 Deliver Data |
|---|---|---|

Representative person who has AI knowledge proposes specification to meet AI development requirements for customers

Produce accurate annotation by cultivated quality management in automotive industry

Max. triple check
Most customers are satisfied with the data after one delivery

Project Manager

Wire Harness

**Many similar points**

Annotation

1 **Quality management for regions**

2 **Region director**

3 **Project manager**

**Industry / Area**  ■ Support for various industries / areas
Please contact us complicated requirements & difficult annotation work especially area extraction & skeleton estimation

| Factory | Satellite / Drone | Mobility | Medical/Nursing care | • • • |
