

Yazaki Mass-produced Meters

Mass-
Produced
Product

Mass-produced meters meeting changes of customer needs according to trends

Background or Challenges

Solutions for improving visibility due to changes in meter mounting position.
Response to different display sizes and various meter designs.

Solutions to Challenges or Features

- 1 Ensuring visibility through Anti-Glare (AG)/Anti-Reflection (AR) processing, Light Control Film (LCF), optical bonding*, etc.

* Optical bonding: A technology that accurately joins 2 or more optical components such as glass, plastic, film, etc. using optical adhesives or bonding agents to form an integrated structure

- 2 Mass production achievements for various display sizes and indicators

Main performance, specifications/structure

Mass
production
Installed in 2024

12.3 inch full display meter
AG/AR processing
LCF

Mass
