

Micro HUD

- Produce conventional display size with minimum housing size.
- Improve mounting performance and vehicle designs by downsizing housing.

Conventional HUDs could not have been installed due to big housing in limited BC segment space. It is necessary to maintain the conventional display size and downsize housing.

Feature

- 1** | Housing size: Max. 2.5L
- 2** | Display size: $7 \times 3 \text{deg@2m}$ (equivalent conventional item)
- 3** | Improve instrument panel design due to downsizing

Performance/Specification

〈Mockup Specification〉

| | |
|----------------------------------|------------------------------|
| Virtual image display brightness | 13,000cd/m ² |
| Weight | Max. 1,000g |
| | Supported polarized sunglass |
