

Temperature Sensor with Chip Thermistor

- Sensing temperature of cooling water and oil in automotive systems
- Sensing temperature of busbars and battery packs etc.

The temperature sensor to be various forms with using chip thermistor instead of leaded glass thermistor.(Transfer mold)

Feature

1

High reliable transfer
mold form

2

Fast reaction

3

High dimensional accuracy and
flexible mounting
(Pull out lead wires and
changeable connector type)

Performance/Specification
