

Low Routing Materials

Low routing products for extending vehicle interior spaces and vehicle design flexibility

Automotive parts are becoming larger due to increasing electric current.
Products are required for routing in small spaces.

Feature

1

Forming Busbar)
Short routing materials:
Use busbar instead
of wires

2

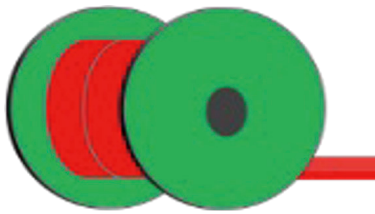

Forming Busbar)
End-To-End manufacturing
from hoop materials to
products

3

Flexible Low Wires)
Connect flexible wires
to edge of busbar

Performance/Specification

【Forming Busbar】

Hoop materials with copper /
aluminum coverings

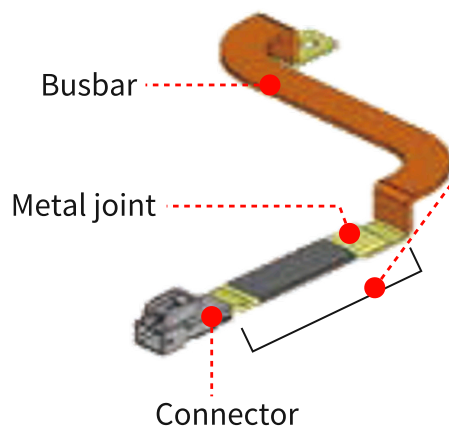

Forming processing

Busbar

【Low routing materials ASSY】

【Flexible Low Wire】

e.g. Put twisted conductors
in low area
