

Zone ECU

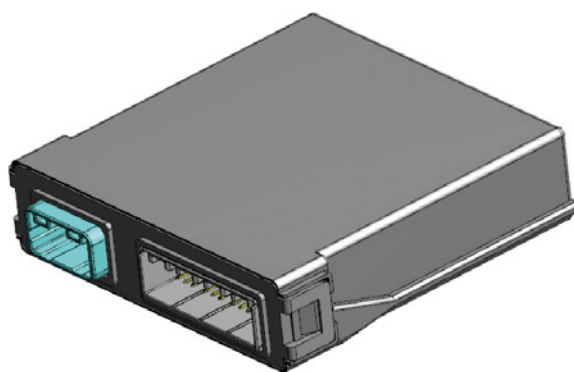

Function

- Proxy input for signals
- Output load
- Power supply (with protective function for short-circuit)
- Communication Gateway

Feature

- Size reduction / Standardization / Structure to contribute scalability
- Setting a reasonable module driver at downstream zone ECU enables to expand circuits. It's flexible to add functions.

Performance/Specification

Specification

Communication	CAN-FD 2ch
	LIN 1ch
Input	76ch
Output	46ch
