# Information Domain Controller

## Function

- Input information has centralized control and optimally displayed by the integrated control unit

## Feature

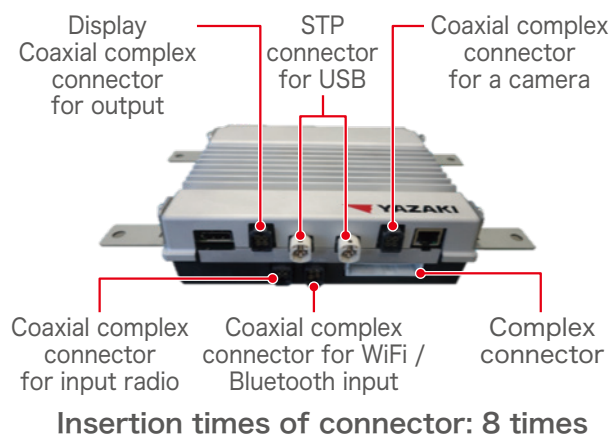

- Downsizing and weight saving
- Easy to assemble (Using integrated connector)
- Scalability (Structure of individual SoC / CPU board, Individual bracket structure)

## Performance/Specification

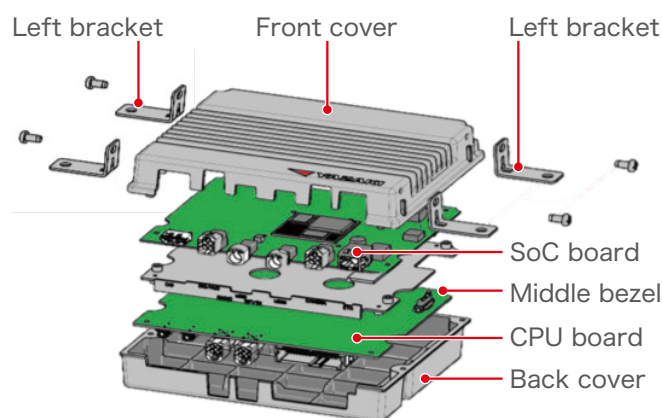

### Size / Weight

Size (D×W×H)	158.4×190.54×54.3mm
Weight	950g
Cooling System	Natural air cooling

### Appearance / Connector

### Parts Structure

#### Individual Bracket Structure

It's available implement to multiple vehicles by replacing bracket

#### Structure of SoC board / CPU board

It's available for multiple OEM / vehicles by exchanging boards

- Number of displays
- Number of input cameras
- Depend on vehicle communications
